

Jeroen Van Hoorebeke - recommendation letter

Jeroen has joined 2K Czech studio in October 2012 as a junior artist. His portfolio and result of 2K Czech tests were very impressive. Also university he just finished prepared him very well for variety of tasks and made him a flexible artist.

He spent few months working with environment artists as we needed to teach him our pipelines. Thanks to his great talent and passion in games he learned really fast. After several months he was able to deliver up to standard quality assets.

His favorite field was character art though so after he has got good level of knowledge of technologies and pipelines we let him work on characters. This is where Jeroen really shined. It was amazing to see how fast he progressed and how his skills were improved. He has got an opportunity to work with programmers on render features also. Even here he proved his ability to work on more technical tasks.

Overall Jeroen is very talented artist with great potential for growth.

Roman Hladík

Art Director at 2K Czech
